

ASISHOW[®] CHICAGO

ASI Show is being redesigned to provide opportunities for suppliers and distributors to re-establish ties with each other while succeeding safely in a reconfigured space.

Currently, ASI Show's safety plan includes:

- All participants must wear face masks at all times while at the show
- Temperature checks prior to entering the event each day
- Hand sanitizer stations throughout the hall
- Clearly-marked one-way aisles on the trade show floor
- McCormick Place has implemented new airflow technology and increased the outside air intake/air change rate during event hours
- Traffic monitoring in exhibit hall and event rooms
- Adequate distancing between participants in education and event spaces
- Facility cleaning protocols
- Updated registration process for mostly contactless entry
- Changes to food and beverage service
- Changes to event scheduling to assist with traffic density and flow
- Room blocks at hotels within walking distance to eliminate large group shuttle transportation
- Please check back here often, as these protocols can change depending on updated CDC and local guidelines.
